

## Plant protection products in hops production in Slovenia - 2022; April 2022

The plant protection products in hops in 2022 has produced a list of registered plant protection products in Slovenia (24 February 2022) and Germany (January 2022) and maximum residue levels of pesticides on the hops in the EU, USA, Japan, China, Korea and Great Britain.

\*Remark: At the moment, the Chinese are establishing their own MRL system. So far, they care about MRLs of established active ingredients (a.i.) only. For others a.i. seems that China unofficially adheres to Codex MRLs, but this is not yet published.
